

MODEL NO. 60064 SINGLE U-HANDLE w/CLAMPS

PARTS LIST

DESCRIPTION	No. REQ'D	PART NUMBER
U-Handle	1	300652
Hardware Complete	1	302425
5" O.D. Pipe Clamp	2	302030*
1/4" x 3/4" Drive Rivet	2	168449*
3/8" Heavy Hex Nut	2	804200*
3/8" x 1 1/2" P.B.H.C.S. w/Patch	2	812053*
3/8" x 3/8" Set Screw	2	811549*

Unless Otherwise Specified, All Units of Measure are Each

**Included in Hardware*

WARNING: Small parts and hardware items may present a potential choking hazard. Promptly remove all unused parts from play area.

SPECIFICATIONS:

Clamps are cast from a 356 high-strength aluminum alloy with a baked-on polyester powder-coated finish. U-handle is fabricated from 1-5/16" O.D. 14-gauge galvanized steel tubing formed into 'U' shape and receives a baked on polyester powder-coated finish.

All hardware is stainless steel.

Weight: 10 lb. / 4.5 kg

INSTALLATION INSTRUCTIONS:

1. Attach U-handle to Upright Post using Pipe Clamps with accompany hardware as shown in the assembly diagram. Plumb and level the U-handle and be sure that the top rung of the U-handle is at 38" (minimum) above deck or ground level. Tighten all clamp fasteners. Also eliminate sharp points and sharp edges (burring) on installed hardware like bolts, nuts, etc.
2. When the assembly is finished and satisfactory, install Drive Rivets in all clamps to ensure clamps cannot slide down posts. See Pipe Clamp sub-assembly sheet. **It is very important that all Drive Rivets be installed before allowing use of the equipment, as clamps are not designed to support substantial weight without them.** Install resilient surfacing material within the *use zone* of play structure in accordance with ASTM specifications F1292 appropriate for the fall height of each structure. Refer to the *Safety Guidelines*.

MAINTENANCE PROCEDURE:

Periodically check hardware for tightness, and tighten as necessary. Always check all parts for breakage or wear, and immediately put equipment out of service until any faulty parts found are repaired or replaced. Also Check all metal parts for rust, paint loss and touch-up if necessary with paint. Check for welded areas and verify integrity. Check periodically resilient surfacing for appropriate depth and remove extraneous materials that could cause injury, infection, or disease. Maintain detailed installation, inspection, maintenance, and repair records for each public-use playground equipment.
