

MODEL NO. 60066 Triangle Deck- Isosceles

PARTS LIST

DESCRIPTION	No. REQ'D	PART NUMBER
Triangle Deck- Isosceles	1	300191
Hardware Complete	1	302426
5" O.D. Deck Clamp	3	301989*
1/4" x 3/4" Drive Rivet	3	168449*
3/8" Barrel Nut	3	804804*
3/8" Heavy Hex Nut	3	804200*
3/8" x 1 1/2" P.B.H.C.S. with Patch	3	812053*

**Unless Otherwise Specified, All Units of Measure are Each
*Included in Hardware**

Warning: Small parts and hardware items may present a potential choking hazard. Promptly remove all unused parts from play area.

SPECIFICATIONS:

Triangle Deck-Isosceles is fabricated from pre-punched 11-gauge steel sheet with built-in 3/8" x 1-3/4" zinc-plated bolts on each corner of the deck for attachment to a deck clamp. The deck uses three 1-1/2" wide by 1/8" thick lower steel flat bar supports which are welded to the deck to increase strength. After fabrication entire deck is plastisol coated to a minimum thickness of 1/8". Perforation size is 5/16" Diameter after coating. Clamps are cast from a 356 high-strength aluminum alloy with a baked on polyester powder-coated finish. Please see Deck Clamp Sub-assembly for specifications concerning Deck Clamps.

All hardware is stainless steel.

Weight: 61 lbs. / 27.7 kg

INSTALLATION INSTRUCTIONS:

1. Place Upright Posts in dug holes at appropriate height per Upright Post installation instructions. Get the height required for the deck from the Plan View Diagram, use a felt-tip marker to mark the top of the Deck Clamp on all three posts.

Hint: If this is the first deck of the structure, locate and concrete one post only (preferably the most shared post, if this deck is part of a multi deck group), ensuring it is plumb and at the right height. After it has had a chance to set, place one corner of the deck against the post and mark the location of the adjacent post. Concrete the second post. Continue this procedure for all posts while leaving the deck on the ground. The deck has been used as its own template, and the deck is now easily attached as its posts are already in place.

2. Attach all three Deck Clamps to Posts with the boss pointing toward the center of the deck. Tighten each clamp slightly using 3/8" x 1 1/2" P.B.H.C.S. with Patch and 3/8" Heavy Hex Nut.

3. Place the deck so that each corner bolt fits on a clamp hole, and fasten using a 3/8" Barrel Nut at each corner. **Do not tighten.** Plumb and level all three posts and brace in position.

4. Using a level, and holding one clamp as a constant, adjust the other two clamps so that the deck is completely level. Tighten all fasteners. At this point, if you have more deck to attach, lay each succeeding deck on the ground against the previous deck's two posts, and mark the missing footings to be dug. Continue attaching deck in this manner.

5. When the deck is completed and correct, pour concrete footings within 4" to the top and taper away from support posts to allow water drainage. Allow curing at least 48 hours before use.

6. When the structure is finished and satisfactory, install Drive Rivets in all clamps to ensure clamps cannot slide down posts. See Deck Clamp subassembly sheets. It is very important that all Drive Rivets be installed prior to allowing use of the equipment, as clamps are not designed to support substantial weight without them. Eliminate sharp points and sharp edges (burring) on installed hardware like bolts, nuts, etc.

MODEL NO. 60066 Triangle Deck- Isosceles

7. Install resilient surfacing material within the use zone of play structure in accordance with ASTM specifications F1292 appropriate for the fall height of each structure. Refer to the Safety Guidelines.

MAINTENANCE PROCEDURE:

Periodically check hardware for tightness, and tighten as necessary. Always check all parts for breakage or wear, and immediately put equipment out of service until any faulty parts found are repaired or replaced. Check for rust or paint loss and touch-up if necessary with paint. Check welded areas and verify integrity. Check Plastisol-coating for bare spots and touch-up with Plastisol if necessary. Clear any trapped debris from deck perforations. Check periodically resilient surfacing for appropriate depth and remove extraneous materials that could cause injury, infection, or disease. Maintain detailed installation, inspection, maintenance, and repair records for each public-use playground equipment.
